

# WELCOME SPRING!

May Flowers are in full bloom. The plants and lawns are pushing out their spring growth.

Our fertilization lawn care program is second to none. Our highly trained and experienced lawn technicians are working on second round. This round includes high quality fertilizer for a dark green color. "The grass is always greener on the Aloha side!"

We are also applying a second application of crabgrass control which has both pre-emergent and post-emergent capabilities. Crabgrass is an annual grassy weed which is best controlled by preventing it. The first frost in the fall will kill all of this year's crabgrass and new crabgrass will grow next year from seed if not prevented.

Broadleaf weeds such as clover, dandelions, and chickweed will be controlled with this application. Broadleaf weeds must first be there before we can treat. This is why we can't control broadleaf weeds early in the season with the first round.

We would like you to try our fertilization program if you haven't already. Please call the office at 208-322-9069 and ask for a quick quote and scheduling. Aloha is offering 1/2 off your

first application.

Ask about our 5 application Tree and Shrub spray program to keep your trees and shrubs nice and healthy. This will also help suppress the insect population so you and your family will not get bitten as often!

Here are a few mowing tips. Make sure to keep mower blades sharp. Cut your lawn at a height of at least 3.5". This will help to keep your lawn healthy and beautiful!

Please call the office for all of your landscaping needs. If we can't help you, we will point you in the right direction. Our services include: Lawn Care Fertilization, Tree and Shrub Spray, Full Maintenance Packages, Sprinkler Systems, Landscape Lighting, Landscape Design / Installation and much more.

We appreciate your business tremendously!

Thank You,
